

## BUILDING YOUR APPETITE

***“With your team’s sculpture built out of donated goods  
We can tower over hunger.”***

This fun filled component is a design/build activity that allows you get your creative juices flowing. Teams will design and build structures made entirely from donated food items! The results will be displayed as a magnificent sculpture exhibit. At the close of the event day, all of the food used in the structures is donated to Project SHARE.

### CONSTRUCTION

You'll need many cans of food and food items to create an architectural masterpiece. It should resemble something a person could relate to (e.g. a house, a car, a tower, etc). We recommend setting up a **trial** at your home church before coming to Glengate.

- ✓ It will boost enthusiasm
- ✓ It will build your teams creativity
- ✓ It will help you design a unique sculpture

Space will be limited on event day. Structures must not exceed 8 feet due to weight restrictions in the facility. Each team will be allotted 100 square feet of floor space to work with. Protective footwear is recommended. It is also suggested to have someone in charge of your build. This person can ensure that a design is properly pre-planned, the appropriate amount of food is gathered (amounts, types, colour schemes etc..) and that the team of builders are organized.

**STEP 1** – Register! (see registration and contact info at the bottom of this form)

**STEP 2** – Get a Building Committee together (no limit to size of committee) and brainstorm on ideas you think will work for your team. Simple is sometimes better and easier to manage. Project SHARE is currently requesting donations of protein items such as tuna, peanut butter and also baby foods. This may help you when coordinating label colours with your project. Other items such as canned pasta, macaroni and cheese and canned vegetables are other helpful products that the agency desires. Remember to think healthy products when determining what non-perishables to use. You can use

**STEP 1** – Register! (see registration and contact info at the bottom of this form)

**STEP 2** – Get a Building Committee together (no limit to size of committee) and brainstorm on ideas you think will work for your team. Simple is sometimes better and easier to manage. Project SHARE is currently requesting donations of protein items such as tuna, peanut butter and also baby foods. This may help you when coordinating label colours with your project. Other items such as canned pasta, macaroni and cheese and canned vegetables are other helpful products that the agency desires. Remember to think healthy products when determining what non-perishables to use. You can use

materials other than canned goods to highlight your design. All we ask from you is that majority of the design be made of foods that can be distributed to the less-fortunate residents in our community.

**STEP 3** – Acquire non-perishables for your project just like you always have in the past. One idea is to designate each team member a certain product to acquire that will fit with your design.

**STEP 4** – Once you have your design and materials all in place... start building! Each team will have 2 hours to assemble their design. Judges will visit each build station to view all of the projects.

## GUIDELINES

1. A typical structure will have a base of 8ft. X 8ft. with an approximate height of 5ft.
2. Each team will be responsible for acquiring their own materials to build their design.
3. Teams are asked to arrive no later than 11:00 am so food can be placed in your area to begin building at 12:00 pm. (If you feel more time is needed please let us know and arrangements will be made for your team)
4. Each team will complete their structure for 3:00pm.
5. Each team will be responsible for assisting with the clean up of their section as well as transporting their donated food to Project SHARE.
6. Safety is important when planning and building your structures. Ensure that your structure is sturdy as so not to injure a team member or spectator. **WAIVER FORMS ARE REQUIRED TO BE COMPLETED BY EACH TEAM MEMBER PRIOR TO THE BUILD-OFF.**

There is no limit as to how many teams can enter the event. Teams will be judged by the following criteria:

Overall appeal - 10 maximum points Originality - 5 maximum points Healthy products used - 5 maximum points Size of design - 5 maximum points Realism - 5 maximum points
---

## BE CREATIVE! HAVE FUN!
